PRESIDENT WILSON SAILS ON WEDNESDAY

ALL IN READINESS FOR HIS TRIP ABROAD.

Goes as Representative of Principles of International

Washington, Dec. 3.—President Wilson will sail for Europe fomor-row. He will land at Brest, France. on Dec. 11, early in the afternoon. By that date the president and his fellow delegates, who will represent the United States at the coming peace conference, will have completed their

program.

There will be a good many conferences en route. As a matter of fact, it is understood here to be the intention of the president to have the correspondence between all of the allied premiers and himself, the va-rious foreign ministers and the state department and the state. department and the great mass of confidential information gathered by the agents of Col. E. M. House since the latter was named over a year ago to compile information dealing with reconstruction of the world considered and fully discussed by all of the delegates. Of course, Gen. Bliss will not be present, but he already is generally familiar with the details, so that this will be no very details, so that this will be no very great handleap.

Pre-Session Conferences.

Pre-Session Conferences.

With all of the delegates completely informed concerning details of what has been transpiring, it will be very easy to reach a basis of common understanding for action when the peace conference actually meets, of course, the president will hold a number of informal conferences prior to the beginning of the regular peace meetings. In these conferences, it is not expected here that any other American representative will participate. As a matter of fact, there will be little need of this, inasmuch as England, France and Italy are to be represented in them only by their premiers,

GEORGE WASHINGTON, SHIP OF STATE

The transport George Washington, newly painted in battleship gray and handsomely decorated, had steam up today at her dock in Hoboken in readiness to carry President Wilson and the peace delegates to France. The exact time of the vessels departure has not been made public here, but officials seemed expectant that the ship would get under way about noon Wednesday. One of the principal tasks of the special force of 300 workers was to enclose the promenade deck in glass to ward off the winter gales. Decorators and fitters gave particular attention to fitting up the suite of three rooms which the president will occu py. Mrs. Wilson's quarters will be directly opposite those of the president. Forty-nine state rooms have been prepared for possible occupants. The dining hall, formerly the officers' mess hall, will accommodate forty persons. The ship's cuisine will be in charge of a well-known New York hotel chef and fifty assistant and waiters.

wars of such magnitude.

Partisan Opposition.

It was agreed here today that President Wilson has failed to eliminate the partisan opposition to his trip by his address of yesterday. Because of the principle of international courtesy, the president could not reveal that he had been urged, even importuned, to make the trip by the very men whom certain inspired sources are today declaring will prove to be the enemies of the United States at the Paris conference. Therefore he was compelled to stand by grows out of America's understanding of the purpose of the president. His attitude will be one of entire friendliness, it is stated, and he will insist only that the rights of all nations should be considered in all movements.

There will, however, be no compromise that will affect the honor of the United States. This country will simply stand firmly for its ideals. It entered the war with a definite procall attention to the fact that the Versailles war council frankly announced that it had not accepted that principle dealing with the freedom of the seas. It was an obvious slip that the president did not include this difference. He is understood to be fully confident that eventually a complete agreement will be reached on this point as on all of the others, and because of this belief, officials said today, he might very easily have concluded there was no necessity of entering into details which a broad announcement covered sufficiently.

Swered old Franklin.

"What is now their pride?" asked this same friend of the colonists.

"To wear their old clothes," answered Franklin, standing in his rude homespun suit before the nobles of England, "over and over again, until they can make new ones."

"What is the number of men in America able to bear arms?"

This was a pertinent question, because, though the Revolution of 1776 was still ten years distant, there was talk of the colonists fighting against taxation.

So far as the suggestions that congress will adopt a resolution declaring the office of president vacant as soon as the George Washington passes out of the three-mile limit are concerned, officials said today that the president was entirely unconcerned. Any action taken will have Every bit of danaruff disappears and half stops

The appalling ravages of Spanish In-

The appalling ravages of Spanish Influenza in this country are perhaps best realized by the statement recently made, that more deaths have resulted in little more than a month from this disease than through our whole eighteen months participation in the pattern of the European war.

Our greatest danger now, declare authorities, is the great American tendency to forget easily and to believe the peril is over. Competent authorities claim the coming of cold weather is very apt to bring a return of this disease and there should be no let-up throughout the winter months of the following easily preserved precautions, remembering that influenza is are easier to prevent than cure.

Influenza is a crowd disease, Avoid crowds as much as possible, Influenza germs spread when ignorant, careless persons sneeze or cough without using a handkerchief. Cover up each cough or sneeze, Do not spit on the floor, sidewalk, in street cars or public places. Avoid the use of common drinking cups and roller towels in public places. Breathe some reliable germicidal and antiseptic air and deatroy the germs that do find lodgment in your nose and throat.

You should carry this inhaler about with you during the day and each half hour or so put it in your mouth and draw deep breaths of its pure, healing germ killing air into the passages of your nose, throat and lungs.

WILSON WILL TELL THEM

"There are, I suppose, at least"-(Question objected to. He withdrew.)
All over the world, as Franklin talked, there were ears strained to catch Franklin's note of freedom. LaFayette, from France, was watching the colonies, hoping that the day might come when, in that far away, wild land, there might be established just one tiny center point

British Ships Could Dam Bolshevik Flood in Esthonia.

Berlin, Monday, Dec. 2.—(A. P.)—If a few British torpedo boats or light cruisers, with even a small landing force, could reach Reval this week, they could dam the bolshevik flood which has been murdering, burning and plundering Esthonia and Lavonio, according to a declaration made to the correspondent by Baron Aexkuell, of Esthonia, who escaped from that country on Thursday in disguise. Baron Aexkuell reports that German forces had begun to evacuate Narva, when they were attacked and defeated by Russian troops.

White guards commanded by former Russian officers were attacked last Tuesday by a superior bolshevik force. The guards gave protection a month ago to 500 Russians who alleged that they had deserted from the bolshevik army because of bad treatment. They brought twenty-three machine guns with them. While the attack was proceeding last Tuesday these Russians fired upon the white guards from the rear, contributing materially to their defeat. The white guards, half annihilated, retired. Senator McKellar Wants Light on America's Promotions.

Washington, Dec. 3.—An inquiry into alleged discrimination against men overseas in the matter of army promotions, was proposed in a resolution introduced in the senate today by Senator McKellar, of Tennessee.

The resolution invites Secretary of War Baker to transmit to the senate, all information with regard to army promotions, both in this country and abroad to the senate.

"Promotion of men overseas has been exceedingly slow, according to my information, while men in the service in Washington, have been jumped in at an amazing rate," Senator McKellar sald.

"I am told at the war department in the service in Washington, have been jumped in a tan amazing rate," Senator McKellar sald.

"I am told at the war department."

Esthonian workmen are nearly all bolshrviki, according to Baron Aevkuell, and the middle classes of Esthonia and Livenia are facing the same reign of terror that the bourgeoisie of Russia have suffered.

REGISTER YOUTHS

New York Law Requires Military Training.

New York, Dec. 3.—Boys in New York state between the ages of 16 and 19 are registering today for military training under the military training law. It is estimated that the number of registrants will total 200,000. About 75,000 boys have aiready been enrolled under the training law, but they must also register, so that complete data may be obtained. Schoolboys are called upon to answer only three questions, but those who have left schools to work must fill out a long and detailed questionnaire.

Every boy will get a certificate assigning him to an armory or school, where drills will take place. Without such a card a boy cannot work or go to school, and if he is decided to be nothing he will be arrested as a vagrant on the antiloning law. The training will take up one and a half hours a week. Socialiste Demand Punishment of Guilty.

Copenhagen, Dec. 3.—The Politikens Berlin correspondent reports that, following the publication of the Munich documents relating to the origin of the war, certain socialist journals demand the immediate appointment of a revolutionary tribunal to judge and punish the guilty. It says the bourgeois press is more reticent. The Tageszeitung contends the German government did not will the war, even if its leaders employed a bluff, but in clumsy hands the bluff caused a terrible catastrophe.

ORIGIN OF WAR

Daily Use of Bitro-Phosphate to Replenish Nerve Wastage. A Great Aid to Longevity and Youthful Tendencies.

Paris, Dec. 3.—(Havas)—The German foreign office destroyed by fire all damaging documents in the archives of the German general government at Brussels and destroyed all documents in Berlin which might be useful in placing responsibility for the war on the German government, Herr Melkenbuhr, a former socialist member of the reichstag, declared in a speech in Berlin, according to advices received here. here.

The revelations of Melkenbuhr, the Paris newspapers declare, throws a singular light on the proposal of Dr. Solf, the German foreign secretary, to have a neutral commission inquire into the origin of the war.

Some people never seem to grow old. At the age when others are feeble, alling, incapacitated for work or pleasure, they seem to retain the freshness of early life so completely or nearly so that they are only the more charming in spite of advanced years.

There exists no real explanation for feebleness of age. Science furnishes no direct and positive answer, but there is a strong probability that when the truth is discovered it will be found that nerve weakness and exhaustion (frequently due to early strain and excesses) are the underlying causes. In other words, if the nerve forces had been kept normal, we would not see so many old people and old young people suffering from lack of energy, languidness, sleepleasness, excessive thinness, irritability, faulty memory, nervous debility, gloomy foreboding, lack of concentrative ability, or the usual run down condition of the system.

But if science is somewhat lacking in its knowledge of causes, there is no lack of knowledge as to what to apply as a remedy for these unnecessary old age conditions which are all too common. Since the important discovery made by the French scientist, Pelouz, that a certain type of phosphate (known among druggists as Bitro-Phosphate) is nearly identical with the phosphorus naturally contained in the nerve cells of the human body there has been no reason why so many need suffer as they now do from depleted nerve force and the accompanying complications. It is only necessary to supply to the bodies of young or old a sufficient quantity of nerve food to keep the cells young, the cheeks glowing with health, the flesh firm and full and the muscles supple and active.

Dr. Frederick Kolle, Editor of New York Physicians' "Who's Who," says: "Bitro-Phosphate should be prescribed by every doctor and used in every hospital to increase strength and nerve force and it entirely not an another of the proper action of the wonderful phosphate discovered by the French scientist, Pelous, and known to every physician in the world as the most desirable reme
